"In the summer of 1864 I was sent to the Amapolis hospital, suffering with chronic diarrhea. While there, I became so reduced in strength that I could not speak and was compelled to write everything I wanted to say. I was then having some 25 or 30 stools per day. The doctors ordered a medicine that I was satisfied would be of no benefit to me. I did not take it, but persuaded my nurse to get me some of Dr. Ayer's Pilis. About two o'clock in the afternoon I took six of these pills, and by midnight began to feel better. In the morning the doctors came again, and after deciding that my symptoms were more favorable, gave me a different medicine, which I did not use, but took four more of the pills instead. The next day the doctors came to see me, and but took four more of the pills instead. The next day the doctors came to see me, and thought I was doing nicely, (and so did I). I then took one pill a day for a week. At the end of that time, I considered myself cured and that Ayer's Pills had saved my life. I was then weak, but had no return of the disease, and gained in strength as fast as could be expected."—F. C. Luce, Late Lieut. Seth Regt. Mass. Vol. Infantry.
